and study in Germany

PRE-MASTER'S PROGRAM OF STEINBEIS UNIVERSITY

To dive into the German educational and business environment, you can prepare for it step by step. Where can a foreign student work? What about speaking German with natives? Shall I improve my English? The Pre-Master's program aims to make applicants fit for studying in Germany along with a job in a German company. During the six months, the students

- ✓ participate in online university block seminars in **intercultural management**. They get prepared for global working environment and German business culture. As a result, the students get a certificate of advanced studies with 5 credit points and invest more time in project work in a company during Master's Program.
- ✓ are in **the talent pool for 50 German companies** and might be invited to **job interviews** during the Pre-Master and 6 months after it. The Steinbeis University guarantees one online interview with a German company. There is a shortage of IT and Engineering professionals in German companies. So, the students are welcome to work on real-life company projects and develop them in the university.
- ✓ have the opportunity to **learn German and reach a B1 German proficiency level** independently.
- ✓ get a chance to **practice business English** during the study interview, university courses and job interviews.

Talent pool? After successfully completing the application process at SCMT, you will be in the talent pool. The SCMT project consultants will start looking for an exciting project for you.

Application to the project company? The SCMT project advisors will find the right project for you and will send your profile to the project company. SCMT project consultants will support and accompany you before and during the interview.

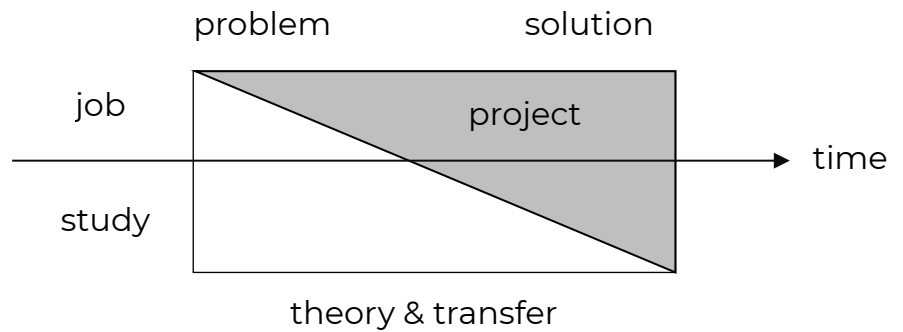

Junior consultant? You start immediately as a junior consultant in your project company. You will implement your own project and create significant value for your project company.

Fellowship in a German company
like **Mercedes-Benz.io, Siemens,
DATEV, SAP, Magna Steyr,
Salesforce** and many more

What areas of employment in German companies are possible?

- IT development
- Digital Marketing
- Digital Media
- Artificial Intelligence
- Simulations
- Engineering
- Mechanical Engineering
- E&E Engineering
- Mechatronics

★ A job at the facility in Germany as well as in other countries
can be offered by a German company!

What is a Dual Master's Program at Steinbeis University?

Steinbeis University is a flagship of project competence private education in Germany. Since 1998 it links theory and practice and supports all-embracing knowledge and technology transfer. Global education with integration of real-life projects at the interface of technology and management is its unique feature. Students are working full-time on a project in a company. They transfer their knowledge from the block seminars right away in practice. Moreover, they develop their company project within their master courses. Steinbeis experts teach, convey, advise, and promote individual interests of each student. Best graduates might be taken over by the company. More information on the [website](#).

'School of Management and Technology' (SMT), 'Steinbeis Center of Management and Technology' (SCMT), 'Steinbeis Global Institute Tübingen' (SGIT) and Export-Akademie Baden-Württemberg (EABW) – four companies offer an excellent study and career path tailor-made for international bachelor graduates.

You are fascinated with the tension between technology and business and want to further deepen your knowledge in both areas? Then the innovative Master of Business Engineering is the answer! The focus is on technology transfer and the related strategic business transformation (business engineering).

Master in Business Engineering

With your analytical way of thinking and your keen interest in technology, you have already successfully completed your bachelor's degree? To expand your know-how even further, a master's degree with a focus on Business Informatics is perfect for you. This degree program deepens both IT-specific and business management knowledge that is required to help determine the future of a company.

Master of Science in Business Informatics

Your bachelor's degree in engineering or industrial engineering has inspired you that you would like to deepen your knowledge even further and want to get a master's degree? Are you interested in the latest technologies? Then you should definitely take a closer look at the Master of Science with a focus on Mechatronics.

Master of Science in Industrial Engineering
