## What is a Dual Master's Program at Steinbeis University?

Steinbeis University is a flagship of project competence private education in Germany. Since 1998 it links theory and practice and supports all-embracing knowledge and technology transfer. Global education with integration of real-life projects at the interface of technology and management is its unique feature. Students are working full-time on a project in a company. They transfer their knowledge from the block seminars right away in practice. Moreover, they develop their company project within their master courses. Steinbeis experts teach, convey, advise, and promote individual interests of each student. Best graduates might be taken over by the company.

'School of Management and Technology' (SMT), 'Steinbeis Center of Management and Technology' (SCMT), 'Steinbeis Global Institute Tübingen' (SGIT) and Export-Akademie Baden-Württemberg (EABW) – four companies offer an excellent study and tailor-made career path.

Fellowship in a German company  
like **Mercedes, Siemens,**  
**DATEV, SAP, Magna Steyr,**  
**Salesforce** and many more

# EMPLOYMENT LINKED MASTER'S PROGRAM AT STEINBEIS UNIVERSITY

**Talent pool?** After successfully completing the application process at SCMT, you will be in the talent pool. The SCMT project consultants will start looking for an exciting project for you.

**Application to the project company?** The SCMT project advisors will find the right project for you and will send your profile to the project company. SCMT project consultants will support and accompany you before and during the interview.

**Junior consultant?** You start immediately as a junior consultant in your project company. You will implement your own project and create significant value for your project company.

You are fascinated with the tension between technology and business and want to further deepen your knowledge in both areas? Then the innovative Master of Business Engineering is the answer! The focus is on technology transfer and the related strategic business transformation (business engineering).

### **Master in Business Engineering**

With your analytical way of thinking and your keen interest in technology, you have already successfully completed your bachelor's degree? To expand your know-how even further, a master's degree with a focus on Business Informatics is perfect for you. This degree program deepens both IT-specific and business management knowledge that is required to help determine the future of a company.

### **Master of Science in Business Informatics**
